What's New In Free Music Album Video Creator?

More than just video editing for your music files, Free Music Album Video Creator organizes your music by song, creates a video slideshow for it, and creates new music video or adjusts the existing ones. It can generate the video slideshow for you or create music videos for those music or songs that you upload to the web.

Download Free Music Album Video Creator for Free. When you go on YouTube to listen to music, it's often that you find the song, along with a static image — usually the album cover — to act as the visual for the video. While people don't necessarily come for those images, perhaps you wondered how such videos got to be made. It's highly likely they were made through Windows Movie Maker, Adobe Premiere, or some other video editor, but what if there was an app to handle that for you? Free Music Album Video Creator is that app, and it turns the whole process into child's play: add your songs, insert an image, and the app will create the video for you. A no-nonsense program This app is as simple as they come, and that's not exactly a

bad thing considering its purpose. Upon booting it up, you'll have to add one or more audio files, and they'll all appear on the right side of the layout. Whether it's an.MP3 or.wav file, the program is pretty welcoming to any audio format. Then comes the image itself. Clicking on Open Album Image will open up File Explorer, prompting you to select a photo for your video. It should be noted that only.PNG files are allowed here: it would have been nice for it to support the.JPG extension, but we reckon it's due to quality constraints that it doesn't. Create your video After all is said and done, users can proceed to complete their clip by interacting with the Create Album Video option. Upon doing so, a console will open up, informing the user about the process. Creating the video doesn't take long at all: the program successfully created ours in less than ten seconds, so we could say it was all smooth sailing. Free Music Album Video Creator is a simple program that accomplishes what it sets out: its use case is for helping users share music on video-sharing websites, and it succeeds in doing so. Description: More than just video editing for your music files, Free Music Album Video Creator organizes your music by song, creates a video slideshow for it, and creates new music video or adjusts the existing ones. It can generate the video slideshow for you or create music videos for those music or songs that you upload to the web. Download Free
