All About Video Games This is a topic that will either make you say, "This guy is talking about my favorite hobby!" or "This guy is talking about a topic that makes absolutely no sense to me!" If you're like me, and you've played a few games, you may have some pretty solid opinions about what makes a game good, bad, or average. The controls were great, and the sense of satisfaction was unparalleled. - Super Mario Bros. Mario may have been a Japanese stereotype as the guy in a red suit, but that didn't make it any less fun to play. Sure, it could get boring after a while, but there was always something new to do, like building the coolest mountain that's ever been built. - Donkey Kong. When the Nintendo 64 was released, I was disappointed because I never liked the characters or the game's graphics. However, Donkey Kong is as much fun to play today as it was in the 1980s. The game is simple, but it never gets boring, and there are always interesting characters to interact with. This was also the first time a Nintendo game did not force you to play as Mario, and it was awesome! - The Legend of Zelda: Ocarina of Time. I'm sure that most of you knew this was the best game of the 16-bit era, but maybe you haven't tried it for yourself. With some of the best graphics of any game ever, Ocarina of Time is the game that everyone should try. It was the first time that there was really a reason to explore the world of Hyrule, and the puzzles were the hardest and most interesting I've ever played in any
